PACIFIC COAST CANNED FRUITS
F.O.B. PRICE RELATIONSHIPS, 1956-57--
CLING PEACHES, PEARS, APRICOTS,
FREESTONE PEACHES, AND FRUIT COCKTAIL

Introduction

This report supersedes and replaces two recently issued reports on Pacific Coast canned fruit prices.^{1/} Those two reports included preliminary data on canners' movement for 1956-57 and were issued to provide the fruit industries with then available marketing information. This report includes, and is based on, final and complete data on prices and movements of the various fruits. The data and analyses of their interrelationships are used by governmental and private marketing organizations in the discussion and formulation of marketing policies, plans, and programs.

The form and organization of this report for 1956-57 follows the general procedure used in the comparable reports of the past several years. The report this year, however, includes more complete data and f.o.b. price relationships for Pacific Coast canned freestone peaches. As in previous years, f.o.b. price relationships are included for cling peaches, Pacific Coast pears, and California apricots.

^{1/} Hoos, Sidney, Pacific Coast Canned Fruits, F.O.B. Prices and Shipments, 1956-57--Preliminary Report for the 1957 Canning Season (Berkeley: University of California, Division of Agricultural Sciences, Agricultural Experiment Station, June 12, 1957), 16p. Processed.

Hoos, Sidney, Supplement to: Pacific Coast Canned Fruits, F.O.B. Prices and Shipments, 1956-57--Preliminary Report for the 1957 Canning Season (Berkeley: University of California, College of Agriculture, Agricultural Experiment Station, June 15, 1957), 19p. Processed.

YESTERDAY I SAW YOU
IN THE PARK, AND I
WANTED TO TALK TO YOU
BUT YOU WERE ALREADY TALKING

Wolfsburg

YESTERDAY WE MET UP WITH A LOT OF PEOPLE FROM THE VILLAGE OF WOLFSBURG. WE WALKED AROUND THE AREA AND DISCUSSED THE HISTORY OF THE VILLAGE. WE ALSO TALKED ABOUT THE CHANGES THAT HAVE OCCURRED SINCE THE VILLAGE WAS BUILT. WE DISCUSSED THE VILLAGE'S PAST AND PRESENT, AND HOW IT HAS CHANGED OVER TIME. WE ALSO TALKED ABOUT THE FUTURE OF THE VILLAGE AND WHAT IT COULD BECOME. WE HAD A GREAT TIME AND LEARNED A LOT ABOUT THE VILLAGE.

WE ARE PLANNING TO VISIT THE VILLAGE AGAIN ONCE A MONTH. WE WILL TRY TO MEET UP WITH OTHER PEOPLE FROM THE VILLAGE AND DISCUSS THE VILLAGE'S PAST AND PRESENT. WE ALSO WANT TO EXPLORE THE AREA AROUND THE VILLAGE AND SEE WHAT IT HAS TO OFFER. WE ARE EXCITED TO SEE HOW THE VILLAGE HAS CHANGED SINCE OUR LAST VISIT. WE ARE LOOKING FORWARD TO OUR NEXT VISIT TO WOLFSBURG.

F.O.B. Prices and Movement, 1956-57

The f.o.b. prices which reflect the average industry experience during the 1956-57 marketing year are summarized as follows:

Canned fruit	1956-57 average f.o.b. prices dollars per case; 24 No. 2½
California cling peaches (choice, No. 2½)	5.35
California apricots (choice, No. 2½)	5.60
Pacific Coast pears (choice, No. 2½)	6.89
Pacific Coast Elberta freestone peaches (fancy, No. 2½)	6.29
California fruit cocktail (choice, No. 2½)	6.22
Hawaiian pineapple (fancy, sliced, No. 2½ f.o.b. San Francisco)	7.40

The movement of canned fruit from canners during 1956-57 is given in detail in the appended tables. But the following summary table indicates the highlights:

Canned fruit	1956-57 movement from canners	
	Total	Domestic commercial
thousands of cases; 24 No. 2½ basis		
California cling peaches	18,300	15,079
California apricots	4,302	3,854
Pacific Coast pears	7,459	6,792
Pacific Coast freestone peaches	4,688	4,688
California fruit cocktail	10,430	8,888

Also, it is estimated that some 13,250,000 cases (24 No. 2½ basis) of pineapple moved into trade channels through packers' and importers' shipments for domestic civilian consumption.

F.O.B. Price Relationships

In addition to providing the basic marketing information summarized above and in the attached tables, this report presents the results of statistical analyses of the major factors which are related to the industry average f.o.b. prices of canned cling peaches, pears, apricots, and freestone peaches. The major price-affecting factors include the domestic commercial movement from canneries, the level of national disposable personal income, and the relative level of prices of canned fruits competing with the respective canned fruits. Those price-influencing factors are shown in tables appended to this report. The f.o.b. price relationships may be summarized as follows:

Canned Cling Peaches

A change of 1,000,000 cases (2 $\frac{1}{4}$ No. 2 $\frac{1}{2}$ basis) in the commercial domestic movement of California canned cling peaches, considered by itself, was on the average accompanied by a change in the opposite direction of about 16 cents a case in the f.o.b. price (choice, No. 2 $\frac{1}{2}$) of canned cling peaches.

An increase of 10 per cent in the index of disposable income, considered by itself, was on the average accompanied by an increase of about 37 cents a case in the f.o.b. price (choice, No. 2 $\frac{1}{2}$) of canned cling peaches.

A change of ten points in the adjusted index of prices of competing canned fruits, considered by itself, was on the average accompanied by a change in the same direction of about 23 cents a case in the f.o.b. price (choice, No. 2 $\frac{1}{2}$) of canned clingstone peaches.

Differences between the actual f.o.b. prices of canned cling peaches (choice, No. 2 $\frac{1}{2}$) and those accounted for by the statistical analysis are given in Table 5 of this report.

Fréttir í fyrirvara um ófálinn ófálfanum eru ekki ófálfar og ófálfir. Þó eru ófálfir til ófálfarar sem eru ófálfir. Ófálfarar eru ófálfir sem eru ófálfir.

Myndir af ófálfum eru ófálfar með ófálfum sem eru ófálfir.

Ófálfir eru ófálfar með ófálfum sem eru ófálfir.

Canned Pears

A change of 1,000,000 cases (24 No. $2\frac{1}{2}$ basis) in the commercial domestic movement of Pacific Coast canned pears, considered by itself, was on the average accompanied by a change in the opposite direction of about 6 $\frac{1}{4}$ cents a case in the f.o.b. price (choice, No. $2\frac{1}{2}$) of Pacific Coast canned pears.

An increase of 10 per cent in the index of disposable income, considered by itself, was on the average accompanied by an increase of about 50 cents a case in the f.o.b. price (choice, No. $2\frac{1}{2}$) of Pacific Coast canned pears.

A change of 10 points in the adjusted index of prices of competing canned fruits, considered by itself, was on the average accompanied by a change in the same direction of about 18 cents a case in the f.o.b. price (choice, No. $2\frac{1}{2}$) of Pacific Coast canned pears.

Differences between the actual f.o.b. prices of Pacific Coast canned pears (choice, No. $2\frac{1}{2}$) and those explained by the statistical analysis are given in Table 9 of this report.

Canned Apricots

A change of 1,000,000 cases (24 No. $2\frac{1}{2}$ basis) in the commercial domestic movement of California canned apricots, considered by itself, was on the average accompanied by a change in the opposite direction of about 62 cents a case in the f.o.b. price (choice, No. $2\frac{1}{2}$) of canned apricots.

An increase of 10 per cent in the index of disposable income, considered by itself, was on the average accompanied by an increase of about 28 cents a case in the f.o.b. price (choice, No. $2\frac{1}{2}$) of canned apricots.

Ensuite

A change of 10 points in the adjusted index of prices of competing canned fruits, considered by itself, was on the average accompanied by a change in the same direction of about 12 cents a case in the f.o.b. price (choice, No. $2\frac{1}{2}$) of canned apricots.

Differences between the actual f.o.b. prices of canned apricots (choice No. $2\frac{1}{2}$) and those explained by the statistical analysis are given in Table 13 of this report.

Canned Freestone Peaches

A change of 500,000 cases (24 No. $2\frac{1}{2}$ basis) in the commercial domestic movement of Pacific Coast canned freestone peaches, considered by itself, was on the average accompanied by a change in the opposite direction of about 40 cents a case in the f.o.b. price (fancy, No. $2\frac{1}{2}$) of Pacific Coast canned freestone peaches.

An increase of 10 per cent in the index of disposable income, considered by itself, was on the average accompanied by an increase of about 50 cents a case in the f.o.b. price (fancy, No. $2\frac{1}{2}$) of Pacific Coast canned freestone peaches.

A change of 10 points in the adjusted index of prices of competing canned fruits, considered by itself, was on the average accompanied by a change in the same direction of about 22 cents a case in the f.o.b. price (fancy, No. $2\frac{1}{2}$) of Pacific Coast canned freestone peaches.

Differences between the actual f.o.b. prices of Pacific Coast canned freestone peaches (fancy, No. $2\frac{1}{2}$) and those accounted for by the statistical analysis are given in Table 17 of this report.

Data

Although the sources of the data on which this report is based are indicated in the footnotes of the various tables, the following supplementary explanations may be noted for the 1956-57 prices, movement data, and other economic information used in the analyses.

The f.o.b. prices of cling peaches, pears, freestone peaches, fruit cocktail, and apricots are industry average prices reflecting cannery operations. The f.o.b. prices for canned pears and freestone peaches reflect operations of canneries in the Pacific Northwest as well as in California. The canned pear and freestone peach prices for the Northwest were collected through the Northwest Canners and Freezers Association and for California were collected through the Canners League of California. The basic price data for canned apricots were also collected through the Canners League of California. The basic price data for cling peaches and fruit cocktail were collected through the Cling Peach Advisory Board. The price data for Hawaiian pineapple are based on published quotations supplemented by trade information.

The data on canner stocks and movement are based on reports issued by the following agencies: for cling peaches and fruit cocktail, the Cling Peach Advisory Board; for apricots, California canned pears, and California canned freestone peaches, the Canners League of California; and for Northwest canned pears and freestone peaches, the Northwest Canners and Freezers Association. The movement data for canned pineapple were derived from trade sources.

The index of United States disposable personal income is based on reports issued by the U. S. Department of Commerce. The levels of competing canned fruit prices, for each of the fruits, are measured by indexes constructed as indicated in Tables 6, 10, 14, and 18 appended to this report. Exports are based on U. S. Department of Commerce reports, and United States government purchases are based on releases issued by the U. S. Departments of Agriculture and Defense.

கால்வை குதிரை என்றும் அழைப்பது ஆகும். இது முறையில் சீர்க்கால் நிலை என்றும் அழைப்பது ஆகும்.

1956-57	5.35	5.60	6.89	6.29	6.22	7.40

a/ Based on weighted average cannery f.o.b. sales prices (for cling peaches, apricots, pears, Alberta freestone peaches, and fruit cocktail) determined from cannery reports on their billings and invoices of sales f.o.b. cannery or dock (including brokerage, cash discount, and swell, label, and case allowances but excluding any special or trade discounts and any prepaid charges included in delivery prices such as freight and marine insurance). Prices adjusted to an industry-wide common or nondifferentiated basis by modification for recognized price premiums conventional for certain brands (commonly referred to as "advertising premium" in earlier years).

b/ The Alberta freestone f.o.b. prices for 1954-55 and 1955-56, respectively, are for Pacific Coast; for earlier years, the f.o.b. prices are for California.

obliged to respond to most questions, but I did not
feel it was necessary to do so in detail.

After the meeting, I had a long discussion with Mr. Clegg, who was very interested in my work. He asked me many questions about my research and I tried to answer them as best I could. We also discussed some of the problems I have been facing in my work. Mr. Clegg was very supportive of my work and encouraged me to continue my research. He also offered to help me in any way he could. I am grateful for his support and encouragement.

Note for Canned Cling Peaches

With price as the dependent variable and the three other variables below considered as the independent variables, multiple-linear regression equation fitted by the method of least squares to the series covering the years 1924-25 through 1956-57 (excluding 1941-42 through 1946-47) is:

$$(1) \bar{X}_1 = -13.428124 -0.158696(X_2) + 9.037853(\log_{10}X_3) + 0.022965(X_4); \bar{R} = 0.98 \\ (4.290865) \quad (19.853410) \quad (7.199514)$$

X_1 is the annual average f.o.b. price (choice, No. $2\frac{1}{2}$) of California canned cling peaches (dollars per case); Table 4, column 1.

X_2 is the canners' commercial domestic movement of California canned cling peaches (in units of 1,000,000 cases); Table 4, column 2.

X_3 is the index of United States disposable personal income (1947-1949 = 100); Table 4, column 3.

X_4 is the adjusted index of prices of competing canned fruits (1947-1949 = 100); Table 4, column 4.

The figures in parentheses are t-ratios of the net regression coefficients, and \bar{R} is the adjusted coefficient of multiple correlation.

análisis od óxidos hidratados.

Los análisis se han efectuado en la Universidad de Valencia y los resultados han sido los siguientes:

1.º) 2000 - RIC-2RI hidrogeolodato de hidrógeno I analizado en 2000: 13.160
En el análisis se han tomado los siguientes resultados: 13.050
(bajoalcalino, Ca^{+2} , Mg^{+2} , Na^{+} , K^{+} , Cl^{-} , SO_4^{2-} , HCO_3^- , OH^-).

2.º) 1500 - RIC-2RI hidrogeolodato de hidrógeno I analizado en 1500: 13.150
(bajoalcalino, Ca^{+2} , Mg^{+2} , Na^{+} , K^{+} , Cl^{-} , SO_4^{2-} , HCO_3^- , OH^-).

3.º) 1000 - RIC-2RI hidrogeolodato de hidrógeno I analizado en 1000: 13.150
(bajoalcalino, Ca^{+2} , Mg^{+2} , Na^{+} , K^{+} , Cl^{-} , SO_4^{2-} , HCO_3^- , OH^-).

4.º) 500 - RIC-2RI hidrogeolodato de hidrógeno I analizado en 500: 13.150
(bajoalcalino, Ca^{+2} , Mg^{+2} , Na^{+} , K^{+} , Cl^{-} , SO_4^{2-} , HCO_3^- , OH^-).

Note for Canned Pears

With price as the dependent variable and the three other variables below considered as the independent variables, multiple-linear regression equation fitted by the method of least squares to the series covering the years 1926-27 through 1956-57 (excluding 1940-41 through 1947-48) is:

$$(1) X_1' = -16.266864 -0.000636(X_2) + 11.954567(\log_{10}X_3) + 0.018426(X_4); \bar{R} = 0.98$$

(5.371940) (10.899770) (2.621884)

X_1' is the annual average f.o.b. price (choice, No. $2\frac{1}{2}$) of Pacific Coast canned pears (dollars per case); Table 8, column 1.

X_2 is the cannery commercial domestic movement of Pacific Coast canned pears (in units of 1,000 cases); Table 8, column 2.

X_3 is the index of United States disposable personal income (1947-1949 = 100); Table 8, column 3.

X_4 is the adjusted index of prices of competing canned fruits (1947-1949 = 100); Table 8, column 4.

The figures in parentheses are t-ratios of the net regression coefficients, and \bar{R} is the adjusted coefficient of multiple correlation.

10. The following table gives the number of hours worked by each of the 100 workers.

Abbildung 1: Die Preisentwicklung von

Haushaltsgütern im Zeitraum 1870-2017 (Index 1950=100) nach dem Preisindex für Haushalte mit einem Erwerbstätigen und einem Kind unter 14 Jahren.

Quelle: Statistisches Bundesamt, Preisindex für Haushalte mit einem Erwerbstätigen und einem Kind unter 14 Jahren.

Die Preisentwicklung ist durch die Inflation bestimmt, welche die Kaufkraft eines Geldes verringert. Durch die Inflation wird die Kaufkraft eines Geldes verringert.

Die Inflation ist die Zunahme des Preises einer Wirtschaftsgüter.

Note for Canned Apricots

With price as the dependent variable and the three other variables below considered as the independent variables, multiple-linear regression equation fitted by the method of least squares to the series covering the years 1924-25 through 1956-57 (excluding 1941-42 through 1946-47) is:

$$(1) \bar{X}_1 = -7.772992 - 0.000623(X_2) + 6.877258(\log_{10} X_3) + 0.012440(X_4); \bar{R} = 0.96$$

(4.497199) (12.805931) (3.741821)

X_1 is the annual average f.o.b. price (choice, No. $2\frac{1}{2}$) of California canned apricots (dollars per case); Table 12, column 1.

X_2 is the canners' commercial domestic movement of California canned apricots (in units of 1,000 cases); Table 12, column 2.

X_3 is the index of United States disposable personal income (1947-1949 = 100); Table 12, column 3.

X_4 is the adjusted index of prices of competing canned fruits (1947-1949 = 100); Table 12, column 4.

The figures in parentheses are t-ratios of the net regression coefficients, and \bar{R} is the adjusted coefficient of multiple correlation.

10. The following table shows the number of hours worked by each employee.

the *Journal of the American Statistical Association*, Vol. 27, No. 177, March, 1932.

Table 15 continued.

* Preliminary; subject to revision.

- a/ No exports of canned freestone peaches are reflected; exports of all canned peaches are considered as cling since no breakdown between exports of cling and frees is available.
- b/ For the prewar years, the only Northwest data available are packs (in actual cases), and they are combined with California data (2 $\frac{1}{4}$ No. 2 $\frac{1}{2}$ basis) to derive estimated Pacific Coast data. For the postwar years, however, Pacific Coast reflects combined data (2 $\frac{1}{4}$ No. 2 $\frac{1}{2}$ basis) on packs and canners' stocks for California and the Northwest.
